

## JOST Australia Thrills Brisbane Crowd with the Latest from JOST and ROCKINGER

JOST Australia's anticipated Brisbane Truck Show appearance demonstrated the latest developments in transport technology, from the acclaimed ROCKINGER brand of towing hitches, to the new series of JOST EverShine Alloy Wheels and the JSK37CXW heavy duty fifth wheel.

A leading supplier to the Australian Heavy Transport Industry, JOST Australia put together a slew of impressive displays much to the delight of truck show attendees. With a focus on towing technology, their displays featured the latest products to show the strength and capabilities of the ROCKINGER range, that is renowned for its comprehensive safety features.

Of the products on display, the updated RO\*500 towing hitch was an audience favourite. Over the years, the RO\*500 gained a reputation for its simple, low-maintenance design and effective release lever technology. Building on this solid foundation of functionality, the updated RO\*500 on show featured multiple groundbreaking safety features, for an, even more, user-friendly product. To best showcase the new and improved developments to the RO\*500, it was shown as a sensor coupling, equipped with a remote display and pivoting angle warning display.

In addition to showing off the updated RO\*500, JOST Australia set out to prove the strength of the ROCKINGER agricultural division, shining a spotlight on the ladder systems that house a wide range of implement connection points. ROCKINGER ladder systems allow for the interchangeability of couplings, eliminating the need for multiple vehicles. The ladder systems accommodate ROCKINGER agricultural and farming products such as the RO560 50mm tow coupling.

Also on show were the brand new series of JOST EverShine Alloy Wheels. The Premium Forged Alloy Wheels feature a low maintenance wheel surface-finish tested for over 240 hours against corrosion to fulfil ISO 9227. JOST EverShine Wheels are resistant to pitting, blistering, corrosion and coating breakdown, and are easily cleaned with just soap and water.

JOST Australia also showcased their new JSK37CXW greaseless 50mm heavy duty fifth wheel, suitable for even the most arduous applications like tanker, stock crate, container, logging, off-road and multi-trailer combinations. Available as a fixed assembly, low profile ball race and double-row ball race assembly, the JSK37CXW is designed to provide extra load capacity for better PBS performance.

Show attendees had the opportunity to learn more about the JOST and ROCKINGER portfolios by consulting with the JOST Australia team who were on site to offer guidance and insights. Visitors to the stand also had the chance to schedule specialised product training sessions as part of JOST Australia's comprehensive technical assistance and after-sales service.

As a branch of the global JOST brand, JOST Australia's operations are tailored to the Australian market. All JOST products are tried and tested to meet Australian safety and environmental standards and whether the harsh Australian climate.

The Brisbane Truck Show is one of the most anticipated events for the Australian Heavy Vehicle Industry and a staple in JOST Australia's calendar. It is an opportunity for leading suppliers and manufacturers to exhibit their latest solutions and engage with industry peers and customers.

The 2019 Brisbane Truck Show took over the Brisbane Convention Centre from the 16th-19th of May, drawing a crowd of over 36,000 visitors across the 4-day event.
