## LV-0 Independant wheel suspension for extra load capacity

By installing an independent wheel suspension, the space surrounding the wheels is put to good use, offering greater load capacity.

- Better utilisation of space - suits a second floor
- Suits loading of forklift trailers and other mobile machinery
- Low mounting height is ideal for glass and concrete transport
- Suits car and boat transport
- Available in one, two and three axle lines
- Low maintenance
- High vehicle stability, better load distribution
