

TRIDEC

Steering and suspension systems

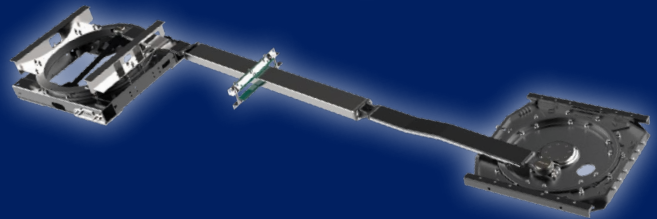

TPO Hydraulic swivel-axle suspension

- For extremely heavy transport
- High axle loads
- Large spring travel
- Steering angles to 70 degrees
- Oscillating axles

TD Mechanical steering system

- Lightweight, compact, versatile
- Ideal manoeuvrability
- Highest stability - low centre of gravity
- Less tyre wear
- Low maintenance
- Steers one or two axles in a two or three axle trailer

HF Hydraulic steering system

- Hydraulic steering system
- Suits extendable and extra length trailers
- Up to 7 steered axles
- Imposed load 50t
- Low centre of gravity
- Increased loading height

LVO Independant air suspension

- Suits double deck trailers or widening trailers
- 60% more capacity
- 1, 2, or 3 axle configuration
- Low centre of gravity
- Available with wheel boxes
